

## Why Are We Suffering?

Is the NHS there to help us or is it there to make money?

Do you know someone that is suffering from cancer or that has died from cancer?

What would you do if there was a possible cancer cure available, but the government and the pharmaceutical companies were withholding it from you?

How would you feel if the individuals providing this treatment were unlawfully imprisoned for daring to provide this product?

The product that we are speaking about is GcMAF, it is a human protein that all healthy people make, that has brilliant effects in the body which include the creation of the most powerful attacks on cancer known to man. Needless to say, it has no side effects.

David Noakes and Lynda Thyer have been under sustained attack from Big Pharma. Lynda is currently in prison in France awaiting trial and David is fighting an extradition order, as the French also want to prosecute him in France.

The problem is that this protein, which is a human body part and a Human Right for all of us, is inexpensive, effective and a threat to, for example, the poison of chemotherapy, which costs £40,000 a round.

In addition to cancer, GcMAF has successfully treated other conditions which include the following:

- |   |  |
|---|--|
| <input type="checkbox"/> ALS                    | <input type="checkbox"/> Autism  |
| <input type="checkbox"/> Autoimmune             | <input type="checkbox"/> Cancer  |
| <input type="checkbox"/> Colitis                | <input type="checkbox"/> Crohns' disease   |
| <input type="checkbox"/> Depression             | <input type="checkbox"/> Fibromyalgia  |
| <input type="checkbox"/> HIV                    | <input type="checkbox"/> Kidney CKD, Liver Disease: severe cirrhosis             |
| <input type="checkbox"/> LMBBS                  | <input type="checkbox"/> ME/CFS  |
| <input type="checkbox"/> Multiple Sclerosis, MS | <input type="checkbox"/> Parkinson's   |
| <input type="checkbox"/> Psoriasis              | <input checked="" type="checkbox"/> Inflammation, viral and bacterial infections |

Now if you know someone suffering from the above, do the government and big pharma have the right to withhold GcMAF from you?
